

Dr. Sanjay Chugh

■ Indications for rTMS

After undergoing intensive training at the Harvard Medical School & Medical University of South Carolina, Dr. Chugh set up the facility for clinical delivery of rTMS. Dr. Chugh's clinic in Delhi is a part of the Global Clinical Trials Network of the Harvard Medical School for rTMS. Different centres worldwide have used this treatment

in a vast multitude of disorders. The list given below is by no means exhaustive and according to Dr. Chugh, it is worthwhile exploring this Non-Invasive Brain Stimulation technique in most forms of chronic, non-responsive medical as well as psychiatric disorders.

rTMS has been used as a treatment for PSYCHIATRIC DISORDERS like Depression, Schizophrenia, Bipolar Disorder, Addictions, Anxiety, Posttraumatic Stress Disorder, Obsessive-Compulsive Disorder, Panic Disorder, Phobias, ADHD and Eating Disorders.

The NEUROLOGICAL DISORDERS for which rTMS has shown good results are Migraine, Stroke Rehabilitation, Parkinsonism, Trigeminal Neuralgia, Multiple Sclerosis, Tinnitus, Autism, Tourette's Syndrome, Fibromyalgia, Chronic Pain and Spasticity due to various aetiologies.

In OPHTHALMOLOGY, rTMS has proven useful in Lazy Eye or Amblyopia.

■ BERKOWITS, a proper place for Skin & Hair Care

SEEMA GOEL

Hair fall a common condition can be quite embarrassing, whatever be your age and can lead to a patchy or total baldness if not cured timely. Sooner the cure faster are the results. Berkowits offers a unique Multiple Therapy i.e. a combination of Low Level Laser Therapy (LLLT) with Acupuncture and Ayurveda to prevent hair loss, oily scalp, Alopecia and dandruff and revitalizing your scalp for re-growth of thicker and healthier hair.

Director Seema Goel Acupuncturist, cosmetologist and Beautician with National Mahila Rattan Award and Radhani Rattan Gold Medal Award, said unwanted hair removal is a daily challenge to millions of males and females. Imagine the amount of productive time, money and energy spent on this? for that Berkowits offers the fourth generation US-FDA approved highly acknowledged, American long pulse, high power Nd:YAG Laser for Unwanted Hair Removal with safest and assured result at surprisingly affordable price, ensures the safety, quality, result and cost at Berkowits by trained practitioner under the supervision of an experienced dermatologist Besides, Treatments from Breast lifting & firming, Pigmentation, Acne, Scars, moles, warts, Dark circles to Obesity, Cellulite fat, Ageing lines, rejuvenation, Glycolic peels and Hi-tech instant Facials are carried by Experts and Professionals to rediscover in you a new look-new zeal and new confidence.

■ National Institute Of Applied Management

Rahul Bishnoi

NIAM was founded in August 2002 by a group of visionaries with a mission to redefine and redesign the contemporary education system. NIAM is the brainchild of proficient Academicians, Technocrats, Financial experts and other professionals from various fields with proven credentials and rich industry experience. NIAM has been the pioneer and undisputed leader in the field of 'Industry Integrated' management education. NIAM education

is, therefore, a blend of 'Academics', 'In house Training' and 'On the job Training'. NIAM has become the focal point and household name for all students who look out for quality education and career assurance. The courses at NIAM, Faridabad campus are affiliated to Maharshi Dayanand University, Rohtak. The institute offers under graduate programmes such as BBA, BBA(CAM), BBA (Industry Integrated), BCA, BSC(H) Computer Science.. The under graduate course B.Sc. Hons. Computer Science caters to the specialized IT education. NIAM, Faridabad also offers MBA (Industry Integrated), a two year regular degree program of Madurai Kamaraj University, Madurai.

LATEST TREATMENT FOR PSYCHIATRIC & NEUROLOGICAL DISORDERS REPETITIVE TRANSCRANIAL MAGNETIC STIMULATION (rTMS)

- BY M.V.SESHADRI

According to Dr. Sanjay Chugh, Delhi based Neuropsychiatrist, who has recently introduced rTMS in India after training in the US and England, this treatment is being referred to globally as the most important advance in the field of neuropsychiatry in the last 50 years. It involves the use of an electromagnet to noninvasively stimulate specific areas of the brain of a patient to elicit a therapeutic response. It is being used in several countries in the world already. rTMS has the ability to selectively modulate or change activity in small areas of the brain. It is used to elicit certain desired effects, either excitatory or inhibitory, that have shown efficacy in treating various conditions or illnesses.

The magnetic field is generated by passing brief current pulses through a hand held, figure of 8 coil placed over the head.

Giving details of the use of rTMS in certain disorders, Dr. Chugh says that Drug resistance, or refractory depression, occurs in up to 30% of cases. It is in these cases that rTMS presents the possibility for greatest benefit. Some have called TMS a 'life saver.'

Most patients with schizophrenia experience auditory hallucinations. With rTMS, a majority of patients showed significant reduction in their voices. Negative symptoms also respond well to rTMS. In OCD & Tourette's Disorder also, significant reduction has been seen in the various symptoms. The same is seen with other anxiety disorders as well.

Stroke victims regained motor performance and accuracy more readily when their motor cortices were magnetically stimulated with rTMS. rTMS sessions appear to have a cumulative benefit for improving gait, as well as reducing upper limb slowness in Parkinsonism.

In Multiple Sclerosis, changes are seen in spasticity & in urinary tract dysfunction. In Migraine, rTMS plays an important preventive role as well.

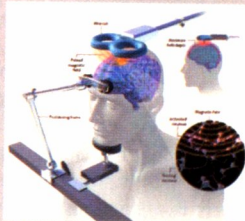

The treatment runs over 20 to 30 sessions of 30 minutes each, given once or twice daily. rTMS can be given along with any other medications that the patient is already taking. Once improvement starts, the requirement for medicines starts to come down, decreasing the side effects produced by medicines & improving the compliance.

rTMS is a very safe procedure and is generally free from side effects when proper procedures are followed. Local discomfort, headache and ringing in the ears caused by the noise of the stimulating coil are minor problems that may be encountered. No long-term risks of rTMS are reported. In pregnancy, the risk to a foetus from rTMS applied to the brain of a mother is almost certainly less than that with medication.
